

Gautam Buddha University

(Established by UP Act (9) of 2002)

Letter of Recommendation

I am pleased to write this letter to recommend **Mr. Sameer Kumar (225/UCS/055)**, a student of **B.Tech Computer Science Engineering, Batch 2022–2026**, for his significant contribution as a **Backend Developer for the Cultural Council Website** at Gautam Buddha University.

Sameer played a key technical role in developing the Cultural Council's digital platform. He independently designed and implemented the **backend system** responsible for managing media content and club-specific assets. One of his major contributions was the development of a dedicated **photo-upload portal**, allowing authorized users to upload event images with tags. These tagged images are automatically displayed on their respective **club pages**, creating a dynamic, structured, and easily maintainable gallery system.

His work involved designing backend workflows, API routes, database logic, and ensuring reliable server-side functionality. Sameer's approach reflected solid technical understanding and practical implementation of backend development principles. He also contributed to various interface integrations and assisted in ensuring frontend–backend synchronization across the website.

In addition to development, Sameer provided ongoing technical support during major university events such as **Abhivyanjana – the Annual Cultural Fest** and **Ignition – the Techfest**, ensuring the website remained updated with event details, schedules, and media content.

Sameer's problem-solving skills, reliability, and strong work ethic were consistently evident throughout the development cycle. His ability to design functional systems and ensure smooth backend operations showcases his technical capability and professional attitude.

I confidently recommend **Mr. Sameer Kumar** for future technical, academic, or professional opportunities. His backend development skills, system design understanding, and dedication to quality make him a strong candidate for roles in software development.

Shakti Sahi
